

Floodplain Development Permit

Fee: \$25

Parcel Number: ____ - ____ - ____

FIRM Zone: _____

FIRM Panel No. _____

FBFM Panel No. _____ (if different from FIRM panel and date)

Fee Amount: \$____
Date: _____
Receipt #: _____
Check #: _____

Review & Determination

1. Is the proposed development partially located in the Special Flood Hazard Area, but the building and/or development is/are not?

- Yes - No permit or further information required. No - See #2

2. Is the proposed development in a floodway?

- Yes - A permit is required and the following information must be submitted by a registered professional engineer or licensed land surveyor for review:
- A certification that the proposed activity in a regulatory floodway will not result in any increase in the height of the 100 year flood and a copy of all data and hydraulic/hydrologic calculations supporting this finding.
- Plans showing the extent of watercourse relocation and/or landform alterations.
- The information and requirements as noted in #3 below must also be provided.
No - See #3.

3. Is the proposed development in a Special Flood Hazard Area?

- Yes - A permit is required and an elevation certificate containing the following information must be submitted by a registered professional engineer or licensed land surveyor to the county for review:
- 100 year base flood elevation (BFE) at the site: _____ ft. NGVD (MSL).
- Proposed elevation of the top of the lowest floor: _____ ft. NGVD (MSL).
- Proposed elevation of floodproofing protection: _____ ft. NGVD (MSL).
- As-Built elevation of the top of the lowest floor: _____ ft. NGVD (MSL).
- As-Built elevation of floodproofing protection: _____ ft. NGVD (MSL).

Proposed Elevations

This approval is issued subject to any conditions attached to and made part of this permit. As-Built elevations must be provided to obtain final approval and a Certificate of Occupancy.

Approval: As-Built Elevations

As-Built elevations have been submitted, reviewed, and approved. This Floodplain Development Permit is issued in conformance with Title §15.28 of the Cache County Ordinance.

Checklist

- The site development plan is complete and depicts flood hazard
- Engineering data is provided for proposed map and floodway revisions
- Floodway Certification and data document no increase in flood heights
- The subdivision proposal minimizes flood damage and protects utilities
- The lowest floor elevation is a minimum of one foot above the base floodplain elevation (BFE)
- Manufactured homes meet elevation and anchoring requirements
- Utilities (furnace, water, heater, air conditioning unit, etc.) are at or above the BFE
- A floodproofing certificate certifies floodproofing design
- As-built elevations must be submitted and approved prior to release of an Occupancy Permit
- Other: _____
